IntelsatOne® Flex

Manage Connectivity on Your Terms

It's your data: Making sure you have the right connectivity in the right place for data transmission is paramount to accomplishing your missions. Backed by the technology and support of Intelsat General Corporation (IGC), let **IntelsatOne® Flex** help you ensure network connectivity to guarantee information flow.

Stay Connected Anytime, Anywhere

Your data needs are increasingly unpredictable with global complexity. **IntelsatOne® Flex** provides an affordable, flexible, secure and powerful way to stay connected so you can be more resilient and productive anytime, anywhere.

AFFORDABLE

- Usage based and full time plans available.
- Customizable, enterprise-grade Mbps.
- Lower cost of ownership leveraging a shared infrastructure.

FLEXIBLE

- Scale your network quickly by purchasing connectivity when and where you need it.
- IGC will manage your satellite capacity to deliver your committed information rate needs.
- IntelsatOne® Flex allows you to easily incorporate high-throughput satellite (HTS) technology into your network, with minimal capital expenditures

ACCESS DATA IN NEW DYNAMIC WAYS

POWERFUL

- A network powered by Intelsat Epic^{NG} satellites, the only proven Ku-band high-throughput satellites constellation with 4 satellites in orbit.
- Redundant services provide one of the most resilient networks available.
- Anytime, anywhere service for the highest level of transmission quality.

SECURE

- Meet and exceed DoD-mandated security requirements.
- Only operator with SOC 3 third-party accreditation.
- Digital payload mitigates both intentional & unintentional jamming.
