

# Intelsat Flex|Exec<sup>®</sup>

Business jet connectivity built to a higher standard

## Inflight Connectivity Engineered for Business Aviation

Intelsat's FlexExec is a global, secure, multi-layered broadband satellite connectivity service that delivers consistent, high performance coverage. FlexExec is uniquely designed for business aviation customers as network capacity is not shared with commercial aviation or consumer broadband customers. This means passengers will have a reliable and consistent connectivity experience anywhere they fly.

## Flexible and Scalable

As the world's first global Ku-band high throughput satellite (HTS) service, FlexExec focuses on high traffic routes with HTS coverage and layers of wide-beam capacity for added resiliency and redundancy. FlexExec enables maximum customer control and choice through nimble, open architecture solutions as well as efficient use of bandwidth which is critical when routes and passenger demand shift unexpectedly.

Additionally, Intelsat remains at the forefront of cybersecurity. It is the only satellite operator certified by an independent auditor for Service Organization Control 3 (SOC 3) compliance. FlexExec gives you the consistency, security and scalability required to meet your business aviation needs now and well into the future.

## Offsite Should Never Mean Offline

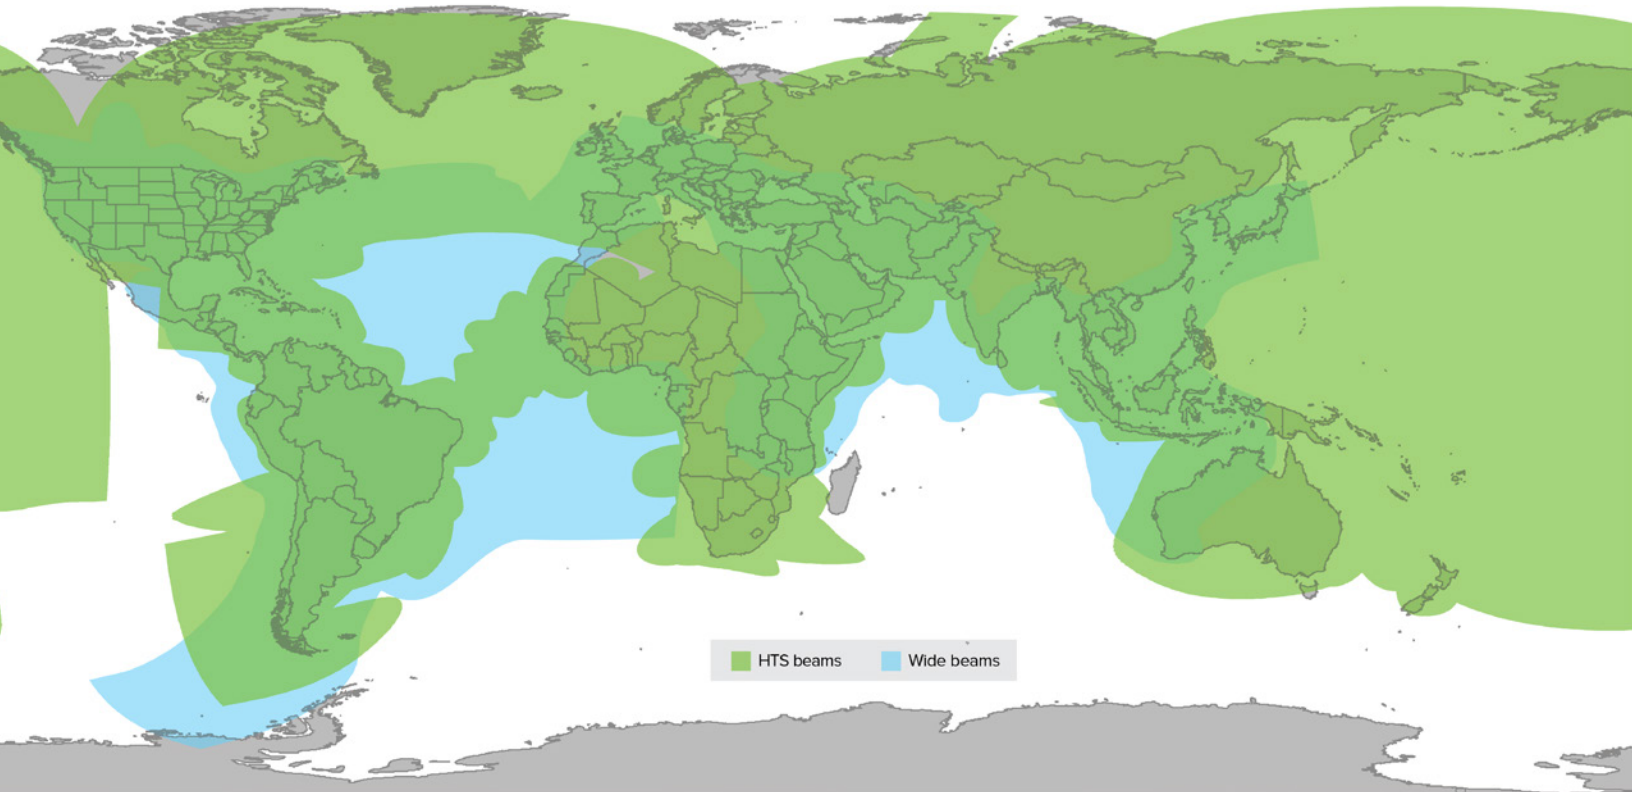

The power of FlexExec ensures a seamless and reliable passenger experience across every device and application, regardless of how many jets are on the network. Passengers will experience unfettered applications while never worrying about staying connected. No matter what service plan you go with, FlexExec speeds are never throttled. The best passenger experience is achieved every time.

## Benefits At-A-Glance

- Strength, breadth and depth of a fully integrated, open architecture Ku ecosystem
- Global, multi-layered coverage specifically committed to business aviation
- Up to 15/2 Mbps speeds supporting streaming video, cloud-based services, email, voice and text
- Industry-first service plan flexibility tailored to meet customer needs
