

Intelsat Teleport Services for Broadcasters

Gateways for Global Video Distribution

Access to Intelsat's global satellite fleet is provided by a collection of teleports designed to support your content distribution needs. Strategically located to connect five continents, our teleports provide reliable and efficient access to locations critical for maximizing the viewership of your content. Media companies trust Intelsat's winning combination of satellite and ground infrastructure to deliver their content securely and seamlessly.

The Industry Standard for Technical Expertise

Our ground infrastructure is managed by a diverse group of seasoned engineers and technicians. The staff are trained and have hands-on experience in the latest media and network technologies. The result is a ground infrastructure team offering unrivaled operational excellence and customer support.

One Source for Global Business Growth

Our teleports host shared and private platforms that enable your customers to enter new markets and regions quickly and cost effectively. From its experienced staff operating and monitoring the teleports 24/7 to state-of-the-art networking and video technology, Intelsat's teleports are designed to provide the infrastructure that supports your business goals.

IntelsatOne Delivers More

The IntelsatOne terrestrial network operates seamlessly with our satellite technology to support hybrid satellite and terrestrial connectivity, with access to multiple platforms and teleports. Intelsat's infrastructure provides a range of managed services from teleport operations to full end-to-end services. Our managed services reduce operating costs, simplify end-to-end management, improve security and reliability, and increase access to industry-leading practices.

About Intelsat

Intelsat's global team of professionals is focused on providing seamless and secure, satellite-based communications to government, NGO and commercial customers through the company's next-generation global network and managed services. Bridging the digital divide by operating one of the world's largest and most advanced satellite fleet and connectivity infrastructures, Intelsat enables people and their tools to speak over oceans, see across continents and listen through the skies to communicate, cooperate and coexist. Since its founding six decades ago, the company has been synonymous with satellite-industry "firsts" in service to its customers and the planet. Leaning on a legacy of innovation and focusing on addressing a new generation of challenges, Intelsat team members now have our sights on the "next firsts" in space as we disrupt the field and lead in the digital transformation of the industry.
