

# Advancing Video Services with Cloud Connect Media

## Extending the Media Network Securely to the Cloud

### Benefits At-A-Glance

- » Increased network resiliency with primary and secondary circuits
- » Easily route content to multiple regions to meet demand
- » Quickly get content to market through already established connections
- » Service Level Agreement of 99.95%

Cloud services have become an essential part of programmers' distribution models. However, the need for multiple networks has made it challenging to securely retrieve content to and from the cloud while simultaneously maintaining distribution reliability. But now, with Cloud Connect Media, you have one network for all your cloud services and distribution needs. Using the reach and power of Intelsat's global media network, Cloud Connect Media directly connects users to cloud infrastructures through private gateways.

### Cloud Services with the Speed and Consistency of a Private Network

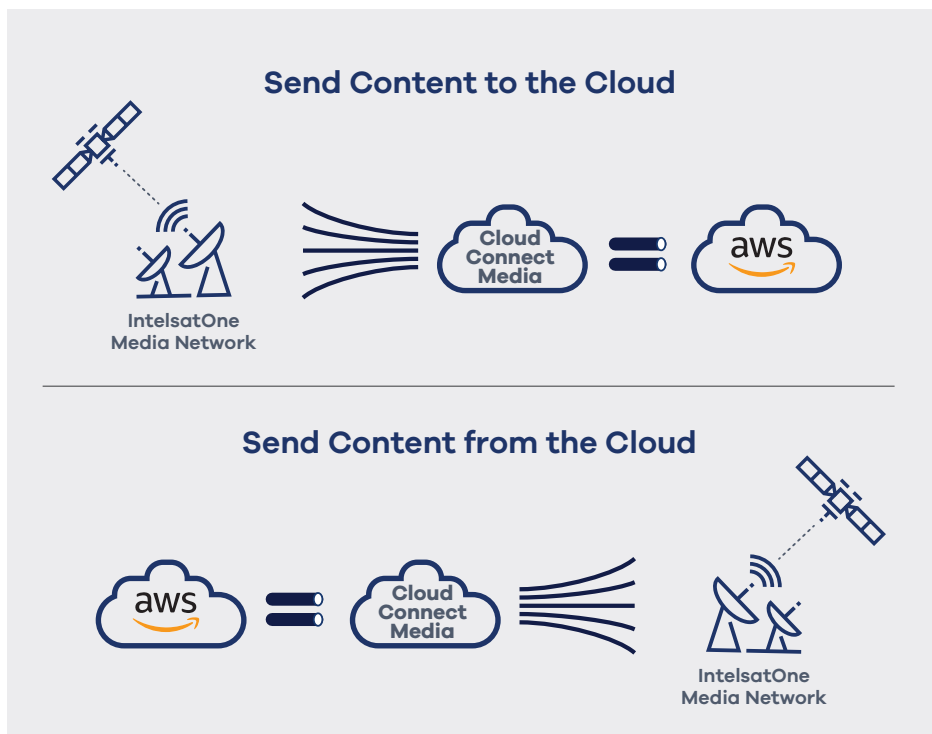

Cloud Connect Media enables programmers to leverage the power of the cloud from virtually anywhere with equal consistency and security. Connecting to

Amazon Web Services (AWS) Direct Connect and the AWS Cloud, it provides you with the ability to access your cloud services while still utilizing Intelsat's full suite of managed services such as uplinking and/or downlinking to key satellites and teleports, colocation, and much more.

### How it Works: Global Media Reach with Private Network Access

Cloud Connect Media connects programmers and broadcasters to their private AWS services as if they were an extension of the Intelsat global media network.

Give users the consistent, secure cloud experience they demand.

### Increase the Value of Your Services

Realize the full potential of your video applications and enhance your business offerings by connecting customers to more media resources with secure, reliable, cloud connectivity.

#### Content Storage

Store your video streams in the AWS cloud for further processing or as a backup option

#### Regional and Global Distribution

Send your video over the Intelsat infrastructure to teleports for satellite uplink
